

# SpeedCast

*Wherever You Are*

Feature Industry  
**MINING**

### Key benefits to our clients:

- Proven reliability with over 25 years of experience in remote connectivity
- Wide suite of communications solutions for exploration, construction, production & decommissioning phases
- Consistent QoS to secure performance of critical communications
- Operational expertise thanks to our highly skilled engineers
- Customer dedication with our 24/7/365 Network Operations Centers and local ground support

SpeedCast has been providing cutting edge satellite solutions for the mining industry for well over a decade. In places like Australia, which has become a global mining hotspot for iron, copper, gold and other significant ores, SpeedCast is the established supplier of choice.

Mining operations are predominantly remote, sometimes hundreds of kilometres from the nearest town. In recent years business pressures have required exploration and mining companies to increase efficiency through use of more advanced IT systems. When geoscientists analyse magnetic resonance imaging in these remote locations to determine whether to drill, the information needs to be confirmed

by experts back in head office thousands of kilometres away. VSAT technology can transfer the data back to base, and the data can be interpreted by the experts and in turn direct the drillers in virtually real-time to locations that will bring larger yields.

SpeedCast's solutions are reliable and flexible, and are easily scalable throughout the life of a mine. From exploration through to shutdown and reclamation, as demand for communication options varies, SpeedCast can deliver the optimal satellite solution.

With access to global networks in both Ku and C frequencies, satellite solutions from SpeedCast make it all possible – Wherever You Are.

*“ Communication is vital to our operations found in some of the most remote parts of Australia. When we are setting up a camp, we need constant contact with suppliers, logistics companies and our staff.*

*SpeedCast has been extremely responsive each time we presented them with a request for a solution, and a typical short timeframe.*

*We rely on SpeedCast to deliver exactly what we need and have no hesitation recommending SpeedCast to anyone requiring reliable comms solutions.* ”
