

# SpeedCast

*Wherever You Are*

Feature Industry  
**NGO**

### Key benefits to our clients:

- Proven reliability with over 25 years of experience in remote connectivity
- Wide suite of communications solutions for emergency response & humanitarian camps
- Consistent QoS to secure performance of critical communications
- Operational expertise thanks to our highly skilled engineers
- Customer dedication with our 24/7/365 Network Operations Centers and local ground support

Non-Government Organizations (NGOs) often find themselves in areas of the world which have been affected by some type of disaster, manmade or natural. Typically, the result on communication is similar, it's either completely destroyed or severely disrupted.

Post-disaster, VSAT communications are an essential tool for search, rescue and relief operations and for coordination. Internet and voice services are at their most critical during the phases of emergency response and forward planning and training

are the only methods to get prepared.

SpeedCast has assisted various organizations involved in relief efforts around the world, providing them with tailor made communication solutions ranging from portable BGAN terminals to quick deploy VSAT systems.

Most recently, SpeedCast worked with NetHope to provide much needed disaster relief in the Philippines, supporting relief agencies and NGO's working in-country.

### ReadyCONNECT™

SpeedCast's ReadyCONNECT™ equipment enables NGO personnel to travel to a disaster affected area with the ability to communicate as effectively as if at their corporate headquarters. Delivering the same level of Internet access, VPN login, voice calls and video conferencing as in an office environment. We have added Wi-Fi and a power generator to extend the service to a camp environment.

Entire teams of personnel can share the communication services wirelessly and seamlessly.

Satellite solutions from SpeedCast make it all possible – Wherever You Are.
